Murray Humphrey in the Medico-Chirurgical Transactions for 1879, --which contains probably the best account to be found of the pathology of growths into the bladder, --to Mr. Nortons cases in vol. xii. of the Clinical Societys Transactions, and to a paper of J. H. Roberts and C. De Morgan in vol. xxi. of the Transactions of the Pathological Society, where the microscopical appearances are very beautifully represented. He also relates a case (p. 359) communicated to him by a Dr. Alexander, where chloroform was given and the urethra dilated; a wire ecraseur was passed, and a large growth was removed; smaller growths were removed by the finger. Fifteen months afterwards it was necessary to remove some more by the finger, after which the patient remained well. This case of Dr. Alexander is doubtless the same as that related in great detail in the London Lancet for August 17, 1878. The writer says he cannot find any other case recorded of removal of a villous growth from the female bladder, and quotes from Bryants Surgery that there is no cure for this affection; the surgeon can only relieve symptoms. The disease usually destroys life in about two years. Enough has been said to show that cases such as I here report are rare, that they cause great suffering and, eventually, loss of life, that the means usually recommended fill in giving relief, and that an operation, easily performed,...
