ELECTRON TRANSPORT CHAIN

Alphascript Publishing. Taschenbuch. Book Condition: Neu. Neuware - An electron transport chain couples a chemical reaction between an electron donor and an electron acceptor to the transfer of H^+ ions across a membrane, through a set of mediating biochemical reactions. These H^+ ions are used to produce adenosine triphosphate, the main energy intermediate in living organisms, as they move back across the membrane. Electron transport chains are used for extracting energy from sunlight and from redox reactions such as...
